

SeongHyeon Kim

Master's student, KAIST AI

shkim0824@kaist.ac.kr

RESEARCH INTERESTS

Model consolidation for large language models, with a focus on model merging and knowledge distillation, including multi-teacher on-policy distillation.

EDUCATION

M.S., KAIST

2025 - Present

Kim Jaechul Graduate School of AI

Statistical Inference and Machine Learning (SIML) Laboratory

Advisor: Prof. Juho Lee

B.S., KAIST

2019 - 2025

Department of Mathematical Sciences (primary major)

School of Computing (double major)

EXPERIENCE

Kakao - Intern

Mar. 2026 - Present

PUBLICATIONS

* denotes equal contribution.

No Pain, More Gain: Iterative Merging for Effective Multi-Teacher On-Policy Distillation

SeongHyeon Kim*, Chaeyun Jang*, Noah Lee, Boseop Kim, Juho Lee

arXiv preprint, 2026

Mixture-Trained Merging for Unified Multi-Objective Models

SeongHyeon Kim*, Chaeyun Jang*, Seungyoo Lee, Jiyeon Ham, Yunju Bak, Boseop Kim, Juho Lee

NeurIPS 2026 (accepted; to appear)

Learning to Explore for Stochastic Gradient MCMC

SeungHyun Kim*, Seohyeon Jung*, SeongHyeon Kim, Juho Lee
